CBSE SQP 2019-2025

Ch- Our Environment

Section – A

Q.1. Explain how ozone being a deadly poison can still perform an essential function for our environment. **(CBSE SQP 2020-21)**

OR

Give reason why a food chain cannot have more than four trophic levels.

Q.2. **Assertion:** Food chain is responsible for the entry of harmful chemicals in our bodies.
Reason: The length and complexity of food chains vary greatly. **(CBSE SQP 2020-21)**

OR

Assertion: Greater number of individuals are present in lower trophic levels.
Reason: The flow of energy is unidirectional.

Q.3. In 1987, an agreement was formulated by the United Nations Environment Programme (UNEP) to freeze the production of "X" to prevent depletion of "Y". "X" and "Y" respectively referred here are: **(CBSE SQP 2023-24)**

(a) Ozone; CFCs (b) CFCs; rays UV
(c) CFCs; Ozone (d) UV rays; Diatomic oxygen

Q.4. Which of the following features relates to biodegradable substances? **(CBSE SQP 2023-24)**

(a) Broken down by biological processes
(b) Remain inert
(c) Persist in environment for long time
(d) May harm the ecosystem

Q.5. **Assertion:** Biodegradable substances result in the formation of compost and natural replenishment. **(CBSE SQP 2023-24)**
Reason: It is due to breakdown of complex inorganic substances into simple organic substances.

Q.6. Identify the incorrect statement: **(CBSE SQP 2024-25)**
'The energy available to the producers is maximum' because:

(a) It is the first trophic level which absorbs1% of light energy directly from the source.
(b) It utilizes the most of the chemical energy for its own respiration, growth, reproduction, movement etc.
(c) It utilizes 10% of light energy and transfers the rest to the next trophic level.
(d) It transfers only 10% of light energy to the next trophic level.

Q.7. Which of the following is not a role of decomposers in the ecosystem? **(CBSE SQP 2024-25)**

(a) Natural replenishment of soil.
(b) Enrichment of oxygen in atmosphere.
(c) Waste decomposition.
(d) Break-down of dead remains.

Hunny Gupta 9990-3256

Q.8. **Assertion (A):** If the lions are removed from a food chain it will not affect the food chain, however if the plants are removed from a food chain it will disturb the ecosystem.
Reason (R): Plants are producers who can make food using sunlight, while lions are consumers. **(CBSE SQP 2024-25)**

Q.9. Which are the correct statements related to ozone? **(CBSE SQP 2025-26)**

(i) Ozone layer helps in increasing the UV radiations reaching earth.
(ii) Ozone is a deadly poison.
(iii) Ozone layer shields the earth from UV radiations.
(iv) Ozone layer prevents UV rays which cause skin cancer.
(v) Ozone is formed with the help of Chlorofluorocarbon's.

(a) (i), (ii), (iii) (b) (ii), (iii), (iv) (c) (iii), (iv), (v) (d) (i), (iv), (v)

Q.10. Which of the following human activities has resulted in an increase of non-biodegradable substances? **(CBSE SQP 2025-26)**

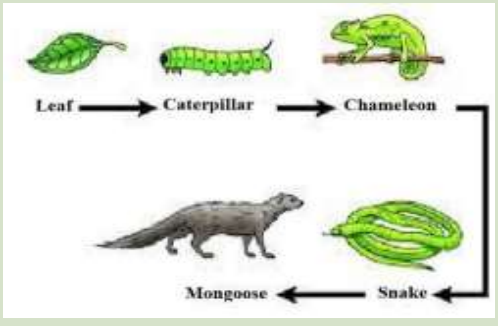

(a) Organic farming
(b) Increase in tree plantation
(c) Use of plastic as packaging material
(d) Composting of kitchen waste

Q.11. **Assertion (A):** Vulture will always have the least amount of pesticides in a food chain.
Reason (R): Vulture occupies the last trophic level and it gets only 10% of energy of the previous trophic level. **(CBSE SQP 2025-26)**

Section – B

Q.12. A lot of waste is generated in neighborhood. However, almost all of it is biodegradable. What impact will it have on the environment or human health? **(CBSE SQP 2022-23)**

Q.13. Study the food chain given below and answer that follows: **(CBSE SQP 2023-24)**

(a) If the amount of energy available at the third trophic level is 100 joules, then how much energy will be available at the producer level? Justify your answer.
(b) Is it possible to have 2 more trophic levels in this food chain just before the fourth trophic level? Justify your answer.

Q.14. The cartoon below addresses a growing concern:
What impact will the process shown in the image have on Humans if they occupy the last trophic level? Explain. **(CBSE SQP 2024-25)**

Hunny Gupta 9999032560

Q.15. About 100 acres of forest land was declared as Natural reserve park. The following organisms were predominant in the Natural reserve park: **(CBSE SQP 2025-26)**

rabbit, frog, grass, fish, fox, water insects, zebra, peacock, snake, trees, bird, owl, insects, tiger, vulture, duck.

Create a food web comprising two separate food chains with different producers by using the above data.

Section – C

Q.16. (i) Create a terrestrial food chain depicting four trophic levels.

(ii) Why do we not find food chains of more than four trophic levels in nature?

OR **(CBSE SQP 2019-20)**

Q.17. How will you create an artificial aquatic ecosystem, which is self-sustainable?

Plastic cups were used to serve tea in trains in early days- these could be returned to the vendors, cleaned and reused. Later, *Kulhads* were used instead of plastic cups. Now, paper cups are used for serving tea. **(CBSE SQP 2020-21)**

What are the reasons for the shift from Plastic to *Kulhads* and then finally to paper cups?

Q.18. Why is damage to the ozone layer a cause for concern? What are its causes and what steps are being taken to limit this damage? **(CBSE SQP 2022-23)**
